

Chimoney Hacktoberfest 2023

Chimoney community is a group of developers and students who have come together. Chimoney itself first helps most to transfer money or sending money across the world without facing challenges and taking minimum time as compared to others which sometimes lock accounts for their users or even taking more than a day to send money yet the money is yet to be used either immediately or that day.

Now the community has collaborated with Google Developer Community Students (GDC) which has traversed most of the Universities mentoring students and contributing to open source projects on GitHub. Most of the students have benefited from the same knowing what an open source project is.
